

Info Sheet

Project Management

Projects management is one of our core services. InnoVius follows the business cases all the way with risk assessment and analysis of each stage: idea, partnership and case teaming, preparation of project, implementation and evaluation of results. The team of experts guarantee competence delivery and providing with best partners and practices to our clients in the case.

LEAN Management

In InnoVius AS, we see LEAN Management as an approach to running an organization that supports the concept of continuous improvement, a long-term approach to work that systematically seeks to achieve small, incremental changes in processes in order to improve efficiency and quality. Through implementation of LEAN management, InnoVius AS seeks to eliminate any waste of time, effort or money by identifying each step in a business process and then revising or cutting out steps that do not create value.

Business Matchmaking

Advanced matchmaking requires vast and flexible network, generating of technologies and tools that might help bridge the gap between business players from different fields, regions, cultures and develops the unique standards for gaining the people and companies in the same place with the same purpose. InnoVius provides with expertise in matching business cases and new ideas, finding the potential partners and building tailor-case integrating approach to clients

Quality Management System

Through introduction of a quality management system (QMS) as a formalized system that documents processes, procedures, and responsibilities for achieving quality policies and objectives, InnoVius AS helps it's clients to coordinate and direct organization's activities to meet customer and regulatory requirements and improve its effectiveness and efficiency on a continuous basis. By introduction of quality management systems, we will help you to improve your organisation's processes, to reduce waste, to lower your costs, to facilitate and identify training opportunities, to engage all staff and set up your organization in wide direction.

Energy Efficiency Consulting

Working with energy efficiency issues is one of our services. InnoVius provides the complex approach to smart solutions in energy optimization related to thermal systems: compressed air systems, building heating systems, alternative energy, HVAC, developing of building automation. We offer custom made engineered solutions. The target is to reduce the cost and energy consumption as more as possible.

Who we are?

InnoVius AS is a Norwegian project management and technical consultancy company.

Our in-house team brings together tens of specialists from a different field of interest. Our connections reach even further as we bring together a network of over 100 partners and associates from Nordic and EU countries. Together, we identify your firm's unique opportunities and challenges, and then deliver local, cost-effective solutions that help your organization realize its full potential and making our clients' ambitions possible. Our people are engineers, designers, project managers, environmental specialists and business service professionals. The breadth of our skills and knowledge allows us to provide a unique integrated approach to projects whatever their size, complexity or geography.

We see our mission in creation of standards that can suite both sides and give the equal approach to donors and beneficiaries.

Our services:

InnoVius AS provides full chain from the project proposal development, matchmaking with leading Norwegian industrial and public authority partners in the target fields and project management throughout the project lifecycle.

Besides the project management in the implementation period we also provide a range of Norwegian consultants in the focal fields, such as: LEAN management, QMS, matchmaking, energy efficiency, renewable energy, climate expertise and green industry.
